

A photograph of a modern interior space. The foreground shows a hallway with light-colored wood plank flooring. To the left, there are thick, dark-stained wooden beams. The walls are painted a light, airy blue. In the background, a white vanity with a sink is visible in a bathroom area. A circular graphic overlay is centered on the image, containing the text.

VISIONS

INSIDE ARCHITECTURE

"Looking Further" is the reflection of our philosophy: a promise that we repeat every day, a commitment to see what others do not see, the meticulous attention to detail, a willingness to take nothing for granted. The synthesis of our work, what makes us different.

We strongly believe in the superior quality of our products and our objective is to develop and produce counterframes that are innovative, sturdy, easy to install and inspected.

Our ambition is to revolutionise the concept of counterframe for sliding pocket door systems, eclipsing any type of door.

We want to be the answer to every functional and space needs, constantly innovating our systems through practical and design solutions.

HOUSE IN TRENTO

PROJECT

Renovation of an 80s building with three apartments.

Ph. Enrico Dal Zotto

LOCATION

Trento (Italy)

YEAR

2017

PRODUCTS

ECLISSE Shodō Sliding Door

ECLISSE Shodō Battente

ECLISSE Shodō Baseboard

This apartment is located on the third and last floor with a balcony overlooking the Lessini mountains, about 30 km from Lake Garda. It consists of three bedrooms, two bathrooms, laundry, living and open plan kitchen.

To emphasise the continuous line generated by Shodō technology, the doors are white lacquered, while the jambs and the skirting are in warm gray shade.

02

HOUSE ML + L + R

PROJECT

New prefabricated single family residential home, made of wood and steel.

ARCHITECT

Filippo Caprioglio
Ph. Enrico Dal Zotto

LOCATION

2016

PRODUCTS

ECLISSE Syntesis Line
ECLISSE Syntesis Line Battente

"The choice of ECLISSE, for this and other projects in our studio, was dictated by the fact that we needed a product that would allow the door element to be part of a broader argument by blending in with the architectural expectations of this specific project, where the system had to integrate into a contemporary type boiserie."

Filippo Caprioglio, architect

03

MATTHIOL BOUTIQUE HOTEL

PROJECT

Renovation of an elegant and traditional 4* hotel that has the characteristics of local buildings of wood and stone.

ARCHITECT

GA and SA associated
Ph. Enrico Dal Zotto

2015

PRODUCTS

ECLISSE Syntesis Line
ECLISSE Syntesis Line Battente

Spaces dedicated to personal care, baths and home Spa have been remodeled using separation doors of modern and elegant design.

For this purpose, ECLISSE Syntesis Collection pocket and hinged doors have been selected. Both types of openings, without any external finishing, are characterised by minimal and sophisticated lines.

04

HOUSING FAIR

PROJECT

The most important exhibition dedicated to housing that is held every year in a different city of Finland.

LOCATION

Vantaa (Finland)

YEAR

2015

PRODUCTS

ECLISSE Single

ECLISSE Syntesis Line

ECLISSE Syntesis Double

ECLISSE sliding pocket door systems, used as separation walls, allow to change the look of the house quickly and easily: perfectly hiding inside the wall, transforming two rooms into a single large unit and an homogeneous space. When closed, they effectively divide the space into two separate rooms.

05

FARO ISLA PANCHA

PROJECT

Rehabilitation of the old lighthouse, respecting the singular elements of the pre-existent building.

ECLISSE Syntesis Baseboard

The Faro Isla Pancha tourist accomodation was born with the purpose of giving visitors, locals and foreigners, the opportunity to enjoy a natural landscape of unique scenic value, from which, in the peaceful spring-summer evenings, the backwater of the waters invites you to rest, to relax.

And in the harsh months of autumn-winter people can enjoy the beat of the waves breaking against the rocks while enjoying the sighting of birds, with the Ría de Ribadeo being the preferred place of passage and stop for large numbers of birds that, coming from the north of Europe and, before continuing the trip towards the South, make a stop to rest and replenish strength, while others choose the Ría as a place to spend the winter.

06

FUNDACIÓN LUKAS KOCH

PROJECT

The Foundation was born with the desire to create a residence to assist and improve the quality of life of people who have very limited psychomotor skills.

ARCHITECT

Christian Klein
Ph. Albert Mollon

LOCATION

Alicante (Spain)

YEAR

2014

PRODUCTS

ECLISSE Single + ECLISSE Hoist
ECLISSE Double

ECLISSE sliding pocket door systems solve the delicate problem of the opening and closing of hinged doors, facilitating the mobility of the elderly and people with disabilities. Disappearing inside the wall, the panels do not hinder the adjacent maneuvering spaces and do not interfere with the passage of a wheelchair, which can move freely without encountering any impediment.

ECLISSE Hoist, the system of elevation with the motor installed in the ceiling, allows to move the patients from the bathroom to the pool. In this way, the staff can move and lower them to the water easily.

ECLISSE Syntesis Baseboard

The initial brief of the project was an essential home, clean in shapes and consistent in aesthetics.

The simplicity of the shapes comes back in the choice of the window frames, but also in the detail of the interior finishes.

For this reason the interior designer opted for sliding pocket door systems and hinged door without frames, with a flush wall skirting to complete the concept.
